

### **Healthcare Strategica Overview**

We're Strategic Advisors, not consultants. In most cases we work with a monthly retainer to advise our clients on the strategies necessary to survive and thrive in today's complex healthcare arena. We will do an assessment of your organization, identify areas for focus, perform a gap analysis and work with you to implement a plan. To the extent your organization lacks the subject matter expertise or simply don't have the bandwidth, we will help you identify the best consultants for the specific need.
